

# Have multiple devices for your ID Management or Visitor Management System?

From criminal background checks to citizenship/working status to various global security certification governments around the world are requiring businesses today to verify who is visiting or working in their facilities. Nidec Sankyo's ID solutions handle the burden of verifying and documenting most forms of driver license, ID card, or passports with a simple scan of the document.

The ability to accurately secure and manage employee, visitor, or customer identification is an important first step to preventing fraud or loss due to frivolous lawsuit. Whether your concern is underage sales, stolen credit card, or just letting the wrong person access to your facility, **Nidec Sankyo Corporation** has a proven solution for you.

## November 2017

**Nidec Sankyo** has been an industry leader in card solutions for over 40 years. Our commitment to quality, reliability and expertise has shaped our technologies to match the needs of an ever-changing market place.

**Nidec Sankyo** designs solutions to suit the customer's vision. We seek to internalize this philosophy of innovation with our company slogan, "**All for Dreams**".

## Introducing **ISI300-0231** the Ultimate Identification Scanner

The **ISI300** can verify, validate, and authenticate global and regional ID card and passport formats by means of OCR and has built in 600 dpi, IR, UV and RFID reading capabilities as well as a built in camera that can be used for ID registration or facial recognition features.

Using our partner software, your business can build its ID directory or have access to other national level directories like the FBI or your state police directory (certain requirements may apply to have access).

Know and trust who is entering and leaving your facility.
